Vocabulary Sort: Write each word in the box of its correct definition

homophone	a device used to make small voices sound larger, especially in a big room
phonology	a woodwind instrument that sends out sounds through its curved, metal body
euphonic	a device used to play the sounds of music as written on records
megaphone	harsh sounds ; bad noise
dysphonia	the study of speech sounds
saxophone	a large funnel-shaped device used to make the voice sound louder by directing the sound waves straight out to listeners (most often used by cheer teams)
cacophony	difficulty producing speech sounds , usually due to hoarseness
gramophone	having a nice sound ; pleasant combination of sounds in words
microphone	the sounds that letters make and the letters that are used to represent sounds
phonics	a word that has the same sound but a different meaning as another word
